

# EAGLE ALIGNMENT DISKS

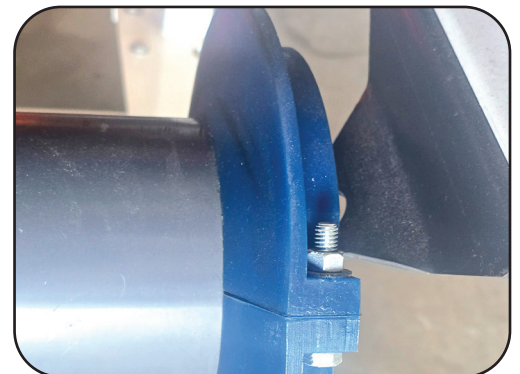

Eagle Alignment Disks are designed to protect a mistracking belt from rubbing against a conveyor frame work, guarding against any side damage. This will extend the life of your belt and help reduce both side tear and premature belt failures.

*Product is best suited for lightweight belts that are no more than 1/2" thick and 42" wide.*

Part Number	Idler O.D.	Disk O.D.
EAD04090	4	9
EAD45090	4-1/2	9
EAD05090	5	9
EAD05012	5	12
EAD06090	6	9
EAD06012	6	12

## Features and Benefits

- Composite molded construction.
- Easily mounts to existing rollers.
- No maintenance necessary.
- Works with reversing belts.
- Disks are available for 4, 4-1/2, 5 and 6" Rollers.
- Disk O.D. is available in 9" and 12"
- We recommend 9" for troughing rollers, installing them right after load zone and right before head pulley.
- We recommend 9" or 12" on return idler rollers, installing them near tail pulley and head pulley.
