

EAGLE CLAW CLAMP

LOW PROFILE ECCLPUL48 & ECCLPUL60

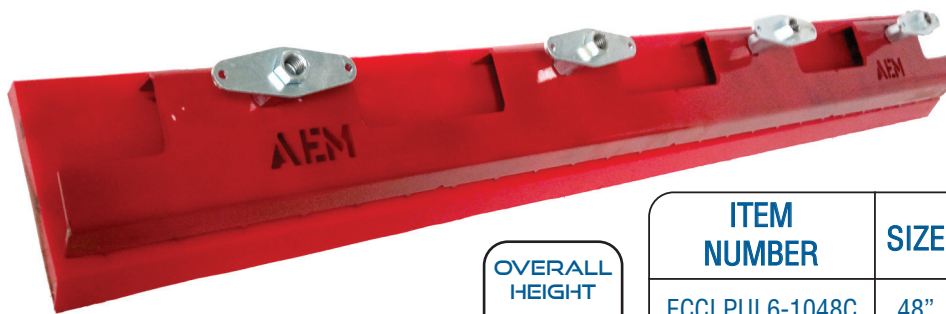

Taking our Sealing Edge Technology™ to a new level, our patented Eagle Claw Clamp with urethane canoe liner will revolutionize your loadzone.

It's everyone's problem. The skirting is sealing to the belt, the clamps are in place, and everything is functioning just as advertised, freshly installed. But as time goes on, the skirtboard stops sealing the way it should. There are Gaps. There is a Mess.

It's not the skirtboard. Skirtboard is flexible by design, enabling it to move around obstacles like splices and patches. The problem is that current clamping systems on the market are not allowing skirtboard to return to the sealing positions.

For those circumstances where you need both containment and a good seal, American Eagle provides the claw clamp assembly that includes an inch-thick canoe liner. Shipped with the associated hardware required for installation, these can be installed in either 48" or 60" sections to secure your loadzone against both dust and material loss.

PATENT NUMBER
9938087

OVERALL
HEIGHT
6"

ITEM NUMBER	SIZE	DESCRIPTION	WEIGHT
ECCLPUL6-1048C	48"	Eagle Claw Clamp Low Profile with Urethane Canoe Liner	35
ECCLPUL6-1060C	60"	Eagle Claw Clamp Low Profile with Urethane Canoe Liner	46

STAINLESS STEEL AVAILABLE UPON REQUEST

FEATURES AND BENEFITS:

ENGAGING TEETH

- Teeth ensure the skirtboard is secure

PROPELLER NUT

- Manual and tool tightening capabilities
- The length of the nut also covers the threaded area for prevention of corrosion

CANOE LINER

- We use standard components that are easily obtained at local hardware stores
